

Spare parts and consumables

Based on longstanding experiences in plant engineering cora services gmbh can offer for various industrial fields mechanical and electrical spare parts. Due to our experience we are also able to deliver you replacement parts, in case the original parts are not available any longer on the market.

In our product range we offer mechanical & electrical components such as e.g. drives, clutches, metal separators (magnetic grids) or sensors, motors or inverters. Further more, we deliver components such as measuring instruments, electrical cabinets or complete plant modifications e.g. conversion of DC drives to AC drives.

Our customer rely also on our supply for consumables. We can mention here consumable material such as gaskets, mesh filters or e.g. traverse guides for textile winding machines.

Mechanical and electrical spare parts

In the following we show you a choice of spare parts we deliver to our customers:

Consumables
